

GenAI-in-a-Box for Universities

Accelerate Alumni Engagement, Knowledge Access & Administrative Efficiency

Modernization Barriers in Higher Education

Disconnected Systems

Siloed systems (SIS, ERP, LMS) hinder data flow and operational efficiency

Manual Communication
Alumni, faculty, and student outreach is slow and unpersonalized

No Central Knowledge Base
SOPs, policies, and manuals are stored in silos

Weak AI Adoption
Universities struggle to use AI meaningfully across operations

Limited Alumni Insights
No structured tracking of alumni activity, donations, or outreach history

Our Gen AI-Driven Solution

Conversational AI Interface

Let's staff ask questions and get instant document-based answers

On-Prem Secure Deployment

Runs fully on local servers with enterprise-grade security

Alumni Management Enablement

Build searchable alumni knowledge graphs, personalize outreach, and boost fundraising

Graph + Vector - Based Search

Combination of Neo4j and Vector DB for smart search

Role-Based Access

Tiered access through Active Directory, secure by design

Single Sign-On

Seamless access for registered users

Secure & Reliable

Quick to deploy, highly secure, reliable at scale, and built for modern university needs

Flexible Commercial Models

On-premise or hosted-your choice; Pay as you go, fixed annual, one-time, or custom pricing

Let's Make Your Data Conversational
